feel stronger?

	Interim	Final
Yes	1	2
Partially yes	11	13
No	9	5

Q2. Have you or your partner become pregnant?

	Interim	Final
Yes	1	1
No	20	19

参加者アンケート結果

(Those who have become pregnant)

Q3. Did you know that oxidative stress is a cause of infertility in both men and women?

	Interim	Final
Yes	1	0
No	0	1

(To those who have become pregnant)

Q4. In how many months after you started taking Twendee X did you discover that you were pregnant? Please fill in the number.

•4th month
•6th month

参加者アンケート結果

(Those who have become pregnant)

Q5. Would you recommend Twendee X to someone suffering from infertility?

	Interim	Final
Yes	1	0
No	0	1

(To those who are not pregnant.)

Q6. Thank you for participating for 6 months. Data from 5,000 couples in Australia who continued antioxidant treatment reported a 1.83-fold increase in the probability of having a baby. And this data was based on one year of antioxidant supplementation.

We may be able to offer the same survey as this one to couples who wish to participate. Would you like to participate?

	Interim	Final
Yes *		16
No *		1
No answer *		2

Questionnaire Results

Q. I feel less tired and recover from muscle aches and fatigue faster.

	Interim	Final

Not sure	18	16

Questionnaire Results

Q. I snore less when I am asleep.	Interim	Final
Yes	2	2
Partially yes	3	8
Not sure	16	10

Questionnaire Results

Participants' comments (free description)

Interim

- I haven't noticed much change yet, so I hope to see more in the future.
- I get very yellow urine.
- I suffer from hay fever every year , but this year I feel better with only a little itchiness!
- I think my coldness has improved. It has been getting hotter recently, and there are more and more stores with air conditioners, etc. Until I took it, I had to wear socks and shoes to go out or else my whole body would get cold, but that seems to have disappeared recently.
- We had a strep throat outbreak in my family, but I was the only one who didn't get it.
- I am still undergoing fertility treatment and have not yet been able to conceive, so I hope for the best in the future. I was surprised to learn that morning sickness is also caused by oxidative stress. I would like to continue taking Twendee X when I am pregnant. Also, my husband's blood pressure was a little high, but it has recently calmed down, which I think is thanks to TwendeeX.
- I feel that the swelling in my legs is less terrible than usual.
- The quality of my sleep has improved, but most importantly, I am able to fall asleep more easily. I used to be unable to fall asleep in bed for hours, or even into the morning in the worst cases, but since I started taking the supplement, I am able to fall asleep easily. Thanks to this, I feel better than before.
- Thanks to this supplement or by chance, I was able to conceive rather quickly, but I had a miscarriage right away. (A thorough examination revealed that the cause was in the mother's body.) I may take the help of this supplement again. Thank you very much.
- I think my hay fever has gotten somewhat better. I want to get pregnant, so I will continue to take it.
- I was surprised that I no longer snore at all and that the roots of my gray hair have turned black. I am not sure about other effects.
- After I started taking it, my usual bad sensitivity to cold became a little better. At first I felt that the tablet was too big to take, but after continuing to take it, it became so easy to take that it became a habit.

Final

- I found out I was pregnant the other day. I think it is because I have been taking the supplement. Thank you very much. I would like to continue taking it even after giving birth if it is possible to take it during lactation.
- I would like to know more about the effects of the ingredients other than vitamin C and coenzyme Q10.
- I used to feel tired even after a lot of sleep, but after a few months of taking the supplement, I started to feel lighter after waking up from sleep. I was happy to see that the effects were gradually emerging.
- Although I could not get pregnant this time, I would be happy if I could try again.
- Even during the change of seasons and days of extreme heat, when we tend to get sick, I and my husband were both in good health. However, I didn't feel the effects immediately, so it was a little difficult to stay motivated for the first two months or so.
- I was disappointed that I could not get pregnant, but I thought that taking it would be better for my body than not taking it. So I kept taking it.
- I became less irritable before my menstrual period. My skin became more moist even though I had very dry skin.
- I don't have hay fever, maybe allergic rhinitis, but I don't have to worry about my nose being runny anymore, and my physical condition has improved in various ways. Thank you for allowing me to continue and experience this for a long time.
- I think blood circulation has definitely improved because my sensitivity to cold has been improved. I would definitely like to participate again if I can continue.
- I think I am less tired overall, and I feel less sick than in previous years. Also, I think I feel a little less depressed mentally. The number of headaches also seems to have decreased.
- I have allergies such as hay fever and rhinitis, and I used to go to the hospital every year during hay fever season, but this year my symptoms were mild, so I just used over-the-counter medicines.
